Summary

Hi there! I'm a seasoned Software Developer with 5 years of experience developing full-stack solutions, with a focus on the frontend. I'm proficient in React, TypeScript and WordPress, but my technology history is diverse and comprehensive - check out my professional experience section for more information.

Currently based in Rio de Janeiro, I'm actively seeking a new Software Development position in a company that offers remote work.

I specialize in PHP, WordPress, React, Node, TypeScript, JavaScript, HTML5, CSS3, SASS, Bootstrap, Tailwind, CodeIgniter 4, jQuery, Docker, MySQL, Git, Next and Node, and I'm passionate about creating software that is robust, scalable, and user-friendly.

If you're interested in connecting or have any opportunities that may be a good fit, feel free to get in touch. I'd love to chat!

Experience

Founder
Site do Médico
Aug 2023 - Present (4 months)
I currently work at Site do Médico, a company where I am the founder. There, I sell personalized websites for doctors and healthcare professionals, with the best practices in UI/UX Design, copywriting, SEO, security and performance. The sites are made with WordPress, our specialty. My main focus is PHP, JavaScript, jQuery, CSS3, HTML5, notions of architecture and image editing in Illustrator and PhotoShop. Our commitment is to deliver the best website to our clients, the most beautiful, the most performant and which is in the top positions on Google. With long-standing support, we make ourselves available daily to help our customers. We also offer WhatsApp marketing and an automatic scheduling system with integrated appointment notification. To do this, we use our own API for integration with WhatsApp and AWS to host it on a VPS.

Full Stack Developer
Webera
Jan 2022 - Oct 2023 (1 year 10 months)
As a mid-level Full Stack Developer, I was responsible for creating the website for Webera, an American DevOps company. In this project I was responsible for reproducing figma's UI/UX screens that were created by the company's Designer on the frontend, so that they were responsive and exactly the same as the prototype. My main focus was WordPress, HTML5, CSS3, jQuery, JavaScript and PHP. I optimized the website's SEO. I was also responsible for creating the Beer With the Boss

website on WordPress for the company, which was one of Webera's products, a podcast made with the owner of the company in which he talked about technology and DevOps topics. Several marketing landing pages were created, using TypeScript, React.js and Tailwind CSS and image design in PhotoShop, Illustrator and Canva. Even editing small videos in After Effects was carried out. We use agile methodology in Notion, GitHub and GitLab to manage codes.

Full Stack Developer
Green Mainframe

Feb 2022 - Aug 2023 (1 year 7 months)
As a mid-level Full Stack Developer, I was responsible for creating the e-commerce of Green Mainframe, a hosting and domain sales company that does not harm the environment. In this project I was responsible for reproducing figma's UI/UX screens that were created by the company's Designer on the frontend, so that they were responsive and exactly the same as the prototype and connecting the backend with the frontend, we used microservices and microfrontends to manage resources. My main focus was React, Next.js, Tailwind CSS, TypeScript, Nest and Node. I optimized SEO on the site. I was also responsible for creating the Green Mainframe blog using Elementor on WordPress.

Full Stack Developer
Mototalk

Jul 2022 - Dec 2022 (6 months)
As a Mid-Level WordPress Developer, I was responsible for creating the e-commerce for one of Motorola's products, which is one of the largest telephone companies in the world, called Mototalk. In this project, I was responsible for reproducing figma's UI/UX screens that were created by the company's Designer on the WordPress frontend, so that they were responsive and exactly the same as the prototype and developing a plugin and a custom theme for provisioning the Mototalk service, when a purchase was made on the website so that the customer could use the application. My main focus was PHP, Rest API, MySQL, HTML5, CSS3, JavaScript and jQuery. We also use Elementor, Woocommerce, Yoast SEO for ranking in search indexes and WP Rocket for performance optimization.

Full Stack Developer
SIB Impact

Jan 2022 - Dec 2022 (1 year)
As a Mid-Level WordPress Developer, I was responsible for creating the website for SIB Impact, an American company, which has an ESG game to raise environmental awareness for companies. In this project, I was responsible for reproducing figma's UI/UX screens that were created by the company's Designer on the WordPress frontend, so that they were responsive and exactly the same as the prototype. My main focus was PHP, MySQL, HTML5, CSS3, JavaScript and jQuery. We also use Elementor, WPML, to translate the site into Portuguese and Spanish, Yoast SEO for ranking in search indexers and WP Rocket for performance optimization.

Jr. Full Stack Developer
Fulltime

Jan 2021 - Apr 2022 (1 year 4 months)
As a Fulltime Jr. Full-Stack Developer, I was responsible for creating the Loto Robot Digital Marketing product and its algorithm that, working with probability, generated Lotofácil numbers that would have a greater chance of being winners. In this project, in addition to the backend, I was also responsible for

reproducing figma's UI/UX screens that were created by the company's Designer on the frontend, so that they were responsive and exactly the same as the prototype. My main focus was PHP, CodeIgniter 4, MySQL, HTML5, CSS3, JavaScript, jQuery and Bootstrap. We use Trello and agile methodology techniques.

Desenvolvimento WordPress
Freelancer.com
Jan 2021 - Jan 2022 (1 year 1 month)
As a WordPress Developer on the freelancer.com platform, I was responsible for offering services for creating landing pages, blogs, e-commerce and institutional websites. My main focus was PHP, MySQL, HTML5, CSS3, JavaScript and jQuery.

WhatsApp Marketing
Freelancer.com
Jan 2021 - Jan 2022 (1 year 1 month)
As a Full Stack Developer on the freelancer.com platform, I was responsible for offering WhatsApp Marketing services using the Baileys API. My main focus was Node.js, Webhooks, Rest API, AWS and MySQL.

Jr. Backend Developer | Estágio
Cefet/RJ - Centro Federal de Educação Tecnológica Celso Suckow da Fonseca
Jan 2020 - Jan 2021 (1 year 1 month)
As a Jr. Full-Stack Developer at Cefet/RJ, I was responsible for managing the federal college's databases as well as developing full-stack solutions. My main focus was Node.js, MySQL, HTML5, CSS3, jQuery and Bootstrap. Furthermore, I was responsible for writing advanced queries for data processing in a system that recorded the electronic time of the institution's employees. I also used Python to generate reports and pdfs of electronic timesheets using SQL Server.

Education

Federal University of Rio de Janeiro
Apr 2021 - Present

Cefet/RJ - Centro Federal de Educação Tecnológica Celso Suckow da Fonseca
Curso Técnico Integrado, Programação/Informática
Jan 2018 - Dec 2020
I studied for 3 years at Cefet/RJ, an excellent federal technical college, where I was able to learn several programming languages such as Java, Python, PHP, HTML5, CSS3, JavaScript, jQuery, MySQL, C, C#, Node, Bootstrap and Git. During the federal institute I got high grades, performing very well. Categorizing as one of the best students in my class. I collected friends and teachers and learned to program.
